

# PLATO STESCI Workshop III

## Thursday 21 November 2019

### Session 7: Stellar rotation and activity (14:30-16:40)

**-Conveners: Antonino Francesco Lanza; Frederic Baudin**

time	[id] title	presenter
14:30	[41] Recent advances in the physics of sunspots and starspots	SOLANKI, Sami
14:50	[42] Models for angular momentum evolution of late-type stars	GALLET, Florian
15:10	[43] HD and MHD models of angular momentum transport and differential rotation	STRUGAREK, ANTOINE
15:30	[44] Surface convection models	Dr KUPKA, Friedrich LUDWIG, Hans-G.
15:50	[45] Recent advances in spot modelling	MEUNIER, Nadege
16:10	[46] Stellar flares in photometric time-series data	STELZER, Beate
16:30	[47] Discussion
