

Theoretical Aspects of Hadron Spectroscopy and Phenomenology

Wednesday 16 December 2020

Session 3 (13:30-15:35)

-Conveners: Juan Nieves

time	[id] title	presenter
13:30	[46] CANCELLED!!! Precision calculations in non- perturbative QCD (II): Effective Field Theories and Lattice QCD (LQCD): Hadron resonances, form factors, LECs, fundamental parameters of QCD and light nuclei spectroscopy	Dr PARREÑO, Assumpta
13:55	[47] Baryon Spectroscopy: Resonance parameter determination	Prof. OSTRICK
14:20	[48] Two-poles structures in QCD	Prof. MEIßNER, Ulf-G.
14:45	[61] Hybrid decays in a chiral model	GIACOSA, Francesco
15:10	[27] Event shapes for massive particles	MATEU, Vicent
